# Rhyme and Reason

**W**e're in the midst of the summer holidays with the return to school looming in a few weeks. New uniforms and pencil cases will soon be making their way to the school gates. Few things bring back the nostalgia of the school playground than game rhymes, be they skipping, counting or clapping. Do you remember any of these?

## Skipping Game

I like coffee, I like tea, I like the boys and the boys like me,  
Yes—No— Maybe so—Yes—  
No— Maybe so ...etc.. (the answer is revealed when the child misses. )

## Counting Out

Eeny, meeny, miny, moe  
Catch a tiger by the toe  
If he hollers let him go,  
Eeny, meeny, miny, moe  
My mother told me  
To pick the very best one  
And you are [not] it.

Each peach, pear, plum,  
Out goes Tom Thumb;  
Tom Thumb won't do,  
Out goes Betty Blue  
Betty Blue won't go,  
So out goes you.

Ibble obble black bobble,  
ibble obble out,  
Turn the dirty dish cloth inside out,  
Once if it's dirty, twice if it's clean,

Ibble obble black bobble, you are out!

Ip dip doo, Doggie did a poo,  
Cat did a wee wee, Out goes you.

## Clapping Rhyme

Mary had a little lamb, she thought it was quite silly,  
To throw him up into the air and catch him by his,  
Willy was a sheepdog, running through the grass,  
Along came a bee and stung him on the,  
Ask no questions, tell no lies,  
I saw a policeman open up his,  
Flies are a nuisance, bees are worse,  
That is the end of my little verse.

# By The Barn *by Angela Sargent*

Walking round our woods, as we fence the odd gap, the noise from Chiff Chaffs is so loud, they must have bred well this year, nesting in undergrowth of Dog rose and Brambles. These are covered in their pink and white flowers and are just turning into the rose hips and blackberries. These will provide feed for birds and insects as Autumn and winter approach.

Dairy farmers are waiting to see what effects the closure of the Muller plant will have on the local suppliers, as well as the families affected by job losses in a rural area and economy.

Silage and hay has been made while the grass had some feed value and now we are waiting for corn and straw.

Follow Angela on Twitter @bythebarn for all things farming.

# Super Safe Sun Fun

August is 'Safety in the Sun Month' and fingers crossed the weather gives us something to be mindful of for the summer holidays!

One thing we often wonder is does a sunscreen with a high SPF (sun protection factor) protect skin better than one with a lower SPF?

The SPF number tells you how long the sun's UV radiation would take to redden your skin when using the product exactly as directed versus the amount of time without any sunscreen. So ideally, with SPF 30 it would take you 30 times longer to burn than if you weren't wearing sunscreen.

An SPF 30 allows about 3 percent of UVB rays to hit your skin. An SPF of 50 allows about 2 percent of those rays through. That may seem like a small difference until you realize that the SPF 30 is allowing 50 percent more UV radiation onto your skin.

Products with very high SPFs often create a false sense of security. People who use them tend to stay out in the sun much longer and they may think they don't need to seek shade, wear a hat or cover up with clothing. They end up getting a lot more UV damage, which, of course, defeats the purpose.

Always look for a water-

resistant, broad-spectrum sunscreen with an SPF of 30 or higher for any extended outdoor activity. Regardless of the SPF, though, it's important to apply two tablespoons to your skin 30 minutes before going outside and reapply it every two hours or immediately after swimming or sweating.

Sunscreen is just one vital part of a strategy that should also include seeking shade and covering up with clothing, including wide-brimmed hats and UV-blocking sunglasses.

## A lush, green and healthy lawn

can really help beautify your garden. Studies show spending time in your outdoor space and reconnecting with nature is a great way to de-stress and improve your mood. However, sometimes despite best efforts, a lawn can really let a garden down. GreenThumb Lawn Treatment Service has the perfect solution: The Lawn Makeover.

So, what does the process of the Lawn Makeover involve? Firstly, a 'Total Lawn Kill' is carried out, providing a clean start by removing all plant life in the lawn area. Two weeks later, the lawn is ready for Makeover Day! Using GreenThumb's unique de-thatching 'Makeover Reel', debris from the killed-off lawn is removed; to achieve superior results, the Lawn Operative will need to reach the soil level. Aeration comes next to improve the air-space and soil structure, promoting a good foundation for grass seed germination.

The pièce de résistance of The Lawn Makeover is 'Diamond Green' - our bespoke grass seed. Diamond Green is an exclusively developed,

custom blend of Fescue and Perennial Ryegrasses, which adapt specifically to any environment. It has many benefits including fast establishment, improved colour as well as improved tolerance to drought, close mowing, shade and disease. We then apply our 100% weed-free, organic and recycled top-dressing to the new seeds, which is nutrient-rich and encourages germination. Next comes our unique seasonal NutraGreen fertiliser, this controlled-release fertiliser feeds the new lawn during its germination period.

At the end of the Makeover Day, we apply our popular Oasis water-conserving treatment before watering in your new lawn. Oasis is designed to complement your watering programme by effectively retaining moisture in the root zone. We will also make 3 follow-up visits as part of a care package over the next 10 weeks; which includes germination progress, watering and mowing advice, and concludes with a bespoke, weed and feed treatment.

A beautiful, vibrantly green and weed-free lawn is possible with The Lawn Makeover, the best way to achieve the ultimate lawn - the GreenThumb lawn.

# Britain's Biggest & Brightest

Love them or loathe them, you can't deny that The Beatles were and are still one of the UK's most iconic bands. Did you know that there's an 'International Beatleweek Festival', which celebrates the music of the most famous pop group the world has ever known, in the city where it all began, Liverpool. The festival is being held this year from 21st - 27th August.

With a wealth of Brit pop & rock based biopics hitting the cinema recently, with 'Rocket Man' and 'Bohemian Rhapsody' (for which Rami Malek won an Oscar for Best Actor) we thought it only right to take a little trip down memory lane and remember all of the best of British musical talent

## Queen

Estimates of Queen's record sales range from 170 million to 300 million records, making

them one of the world's best-selling music artists.

## Elton John

Born Reginald Kenneth Dwight, in Rolling Stone ranked Elton John 49th on its list of 100

influential musicians of the rock and roll era.

## Black Sabbath

Black Sabbath were an English rock band, formed in Birmingham in 1968, by guitarist and main songwriter Tony Iommi, drummer Bill Ward, bassist and main lyricist Geezer Butler and singer Ozzy Osbourne. Black Sabbath are often cited as pioneers of heavy metal music.

## Rolling Stones

The Rolling Stones have sold over 240 million albums worldwide and have held over 48 tours of varying length, including three of the highest-grossing tours of all time: Bridges to Babylon Tour, Voodoo Lounge Tour, and A Bigger Bang Tour.

## Iron Maiden

Despite little radio or television support, Iron Maiden are considered one of the most successful heavy metal bands in history, with The Sunday Times reporting in 2017 that the band have sold over 100 million copies of their albums worldwide. Singer Bruce Dickinson even holds a pilot's licence and flies the band's very own plane named 'Ed Force One' named after the band's longtime zombie creature mascot Eddie.

# Fight the Frizz

With warm weather foot some of us will know the joys of unpredictability that warm and humid weather can bring to our hair. Frizz is mostly caused by a lack of moisture in your hair or humidity and excess moisture in the air.

Another

common cause of frizz is dry hair or damage. Let's say you have dry or damaged hair and you go outside when it's humid—what happens to your hair? The hair is dry, which means it wants to absorb all that moisture from the environment.

## **1. Choose a sulfate-free, glycerin-packed shampoo.**

When selecting a shampoo, look for products with glycerin listed high up on the ingredient list. The closer glycerin is listed to the top, the more concentrated it is in the product. Glycerin helps combat frizz by penetrating the hair and hydrating it from the inside out. It is also a great humectant, meaning it absorbs that extra moisture in the air and creates a protective coating over the outside of the hair keeping moisture trapped in.

## **2. Twice a week, only use conditioner on your hair.**

You might think your hair needs to be shampooed several times a week, but in reality, it actually doesn't. Every two days, apply conditioner only and skip shampoo, then rinse it out. Conditioner contains a small amount of surfactant, which is what shampoo uses to cleanse your hair.

As well, conditioners contain a small amount of oil which attaches to the oils in the hair, cleansing it away. This is also called "Co-Washing" which helps keep the hair at optimum PH as you are replenishing moisture and ensuring the natural oils in your hair are not being stripped away.

## **3. Incorporate coconut oil into your hair routine.**

Coconut oil has endless benefits for your hair, especially when it comes to frizz. Try to make a habit of using pure, organic coconut oil in your beauty routine. You can use it two ways; the first being as a mask. Apply coconut oil down the length of the hair, letting it sit for a few hours or using it as an overnight treatment. The result is visibly smooth and touchably soft hair.

## **4. Let your hair air dry 90% of the way before blow-drying.**

By letting your hair partially air dry, you are allowing it to dry without disrupting the hair strand, which helps to keep it smooth. While the heat of a blow dryer can cause damage, using a blow dryer when your hair is already mostly dry minimizes the risk. Just be sure to keep the dryer on a low heat setting and hold it 6 inches away from your hair at all times. Also, be sure to move the dryer around consistently so that it doesn't overheat a certain section of the hair and cause damage.

# On The Move by Derby Cats Protection

**M**oving house? Cats Protection says: 'You may want to book your cat into a cattery for the duration of the move. If so, make sure his or her vaccinations are up to date. If you don't do this, it's best to keep your cat in a separate cleared room while packing and loading is going on. You'll need to get the cat used to this before moving day and remember to have the details on your microchip amended.'
